Host your stay with TripArro

TripArro is a booking website for homestays, villas, cottages and resorts. Travellers find your stay, check live availability and book and pay online - and you manage everything from a simple dashboard on your phone. Joining is free (listing is free; plans are an optional upgrade with the TripArro AI tools), and you keep your prices, your guests and your other booking platforms.

0%
commission for your first 30 days

8%
commission after that, after check-out

Rs. 0
commission on Airbnb & other platforms

Why hosts join TripArro

- **0% commission for your first 30 days**
  New hosts keep the full stay amount on every booking in their first 30 days. After that the normal 8% applies, only on completed stays. No joining fee and no monthly fee.
- **An AI agent that finds your stay - and books it**
  Guests tell TripArro's AI what they want - dates, budget, group, the kind of place - by typing or by voice. It shows matching stays as photo cards with live prices, checks your real calendar, and books only after the guest taps Yes. When a guest asks for the host, the chat comes to you with a notification sound. Phone numbers and emails are kept out of chat messages until a booking is paid.
- **Guests who bring their friends**
  Every guest has a Refer & earn link: friends who join get wallet money for their first booking, and the guest earns a bonus after the friend's first stay. TripArro pays these rewards - they never come out of your payout.
- **Run it all from the app**
  The TripArro Android app shows all your listings on one calendar, checks guests in with your camera (ID numbers stored masked), and brings guest messages and payouts to your phone.
- **Your discounts, your decision**
  Every new stay gets its own coupon code (10% off to start). Change it, pause it or delete it from your dashboard - only you set what your guests are offered, and the AI never offers more than the limit you allow.
- **Smart pricing that stays under your control**
  Switch on smart pricing and your nightly price follows demand, weekends and the peak dates you mark - always between the lowest and highest price you set. Leave it off and your prices never change.
- **Earn the Guest favourite tag**
  When your listing passes 10 guest bookings on TripArro, it gets the Guest favourite tag and 2 days of Sponsored advertising free, started on a date you pick. The tag is earned by real bookings - it is not given to every listing.

- **Paid online, paid out to you**
  Guests pay by UPI, card or net banking through a secure payment gateway, or pay an advance and the rest at your property. Our 8% commission is taken only after the guest checks out, and every payout comes with a statement.
- **No commission on your other platforms**
  Bookings from Airbnb, Booking.com, MakeMyTrip and other platforms come into the same calendar so dates never clash - and TripArro charges nothing on them.
- **Guests see what is around you**
  Your page shows how far you are from nearby things to do, and from the bus stand, railway station, temples, churches and other transport - so guests can plan their trip and book with confidence.
- **Your bookings stay between you and your guest**
  New-booking emails go only to you and the guest who booked - they are not copied to anyone else. Guest ID photos taken at check-in are kept private to your property.

How you earn

- Guests pay online by UPI, card or net banking - or pay an advance and the rest at your property.
- Our 8% commission is worked out only after the guest checks out.
- Paid online: your share is paid out to your bank account or UPI, with a statement for every payout.
- Paid to you directly (cash, UPI at the property): you get one invoice at the end of the month for the commission and fees, and pay it online in a minute.
- Bookings from Airbnb, Booking.com, MakeMyTrip and other platforms share your calendar - no commission on them.

Live in four steps

1. **Apply**
   Fill in the short form on our website. It takes a minute.
2. **We call you**
   Our team calls within 1-2 working days, explains everything and checks the details.
3. **Your page goes live**
   Add photos (or import your Airbnb listing), prices and rules, and connect your other platforms.
4. **Welcome guests**
   Get bookings and payments, check guests in from your phone, and receive your payouts.
